PREFACE

This is the Third Edition of a bulletin originally published in April, 1944, and revised in July, 1945. Previous editions are now exhausted or obsolete, and since the bulletin appears to serve a useful purpose, it seems advisable to publish this Third Edition with the information corrected to October 1, 1948.

The scope of the bulletin should be clearly understood. Part I contains a list of official State agencies established by statute and concerned either directly or indirectly with the natural resources of Maryland. Part II lists the non-official conservation organizations, in other words, those organizations which have arisen spontaneously among interested citizens of the State.

In both Part I and Part II we have purposely excluded strictly local officials, organizations and clubs, and have included only those whose activities are State-wide. We have likewise omitted Federal agencies for the reason that contact of the public with Federal officials is generally through State representatives.

The Board of Natural Resources is pleased to acknowledge its debts to the various official and non-official organizations listed herein for their interest and cooperation in the preparation of this bulletin.

WILLIAM H. BAYLIFF, *Executive Secretary,*

PREFACE

This is the Second Edition of a bulletin originally published by the Board of Natural Resources in April, 1944. The First Edition has long since been exhausted, and since the demand continues, it seems desirable to correct and republish this information.

The scope and purpose of the bulletin should be understood. Part 1 contains the official State agencies, or, in other words, those established by statute. Section A of Part I includes those agencies associated with each other under the Board of Natural Resources; Section B includes those independent of the Board of Natural Resources. Part II contains the non-official conservation agencies of the State; those which have arisen spontaneously from interested citizens.

In both Part I and Part II we have purposely excluded strictly local officials, clubs, and organizations, and included only those whose operations and activities are State-wide. We have likewise omitted Federal agencies for the reason that contacts of the public with Federal officials is generally through State representatives.

We are indebted to William H. Bayliff, Executive Secretary of the Board of Natural Resources, for the labor of preparing this material for publication. Grateful acknowledgement is also made to the various non-official organizations for their cooperation and interest in the preparation of this bulletin.
